EasyID®
ADVANCE

EasyLABEL	EasyFORM	EasyID-MOBILE	EasyCAM	EasyREG	Downtime

EasyCAM, a module of EasyID®ADVANCE, is an affordable tool for increasing patient safety while enhancing positive patient identification by providing the ability to capture a patient photo. Once the photo is captured, it can be associated with a patient identifier and instantly recalled. The photo can be viewed on screen or printed to any wristband, label, document, or hospital identification card and stored in the EasyID® database or interfaced to another system using EasyARCHIVE.

FEATURES AND BENEFITS:

- Enhances positive patient identification and patient safety by working with EasyLABEL to add photos to wristbands, labels and/or patient photo ID cards.
- Enhances positive patient identification by working with EasyFORM to add patient photos to other patient documents.
- Helps reduce healthcare fraud by providing visual ID confirmation.
- Photos can be viewed using EasyWEB or interfaced to an imaging system using EasyARCHIVE.
- Uses common webcam hardware.
