# A Guide to Face Mask Selection and Use

**Choose the right mask for the task!** Select the mask design, fit and filtration that matches the protection needs for each procedure or risk level. The Crosstex® MaskEnomics® filtration guide makes it easy to find the level of filtration required, including ASTM Level 1, 2 and 3.

LEVEL PERFORMANCE LEVELS

## MAXIMUM FILTRATION

**NIOSH Approved N95 Particulate Respirator**  
**High Fluid Resistance** 160 mmHg  
**Filtration Efficiency** PFE = 99.9% @ 0.1 micron  
**Breathability - Delta P** > 5.0 mm H<sub>2</sub>O/cm<sup>2</sup>  
**Flame Spread** Class 1

**N95**

Indicated for use when treating patients with airborne diseases such as TB or influenza.\*

Meets CE 0121 – In reference to EN 149: 2001 FFP2 NR.

Pictured: Isolator Plus® N95 Particulate Respirator

## ASTM LEVEL 3

**High Fluid Resistance** 160 mmHg  
**Filtration Efficiency** BFE ≥ 98%  
 PFE ≥ 98% @ 0.1 micron  
**Breathability - Delta P** < 5.0 mm H<sub>2</sub>O/cm<sup>2</sup>  
**Flame Spread** Class 1

**LEVEL 3**

Ideal for procedures where heavy to moderate amounts of fluid, spray and/or aerosols are produced.

Meets EN14683 Rating – Type IIR Standard.

Pictured: Ultra™ Sensitive Earloop with SecureFR™ Technology

## ASTM LEVEL 2

**Moderate Fluid Resistance** 120 mmHg  
**Filtration Efficiency** BFE ≥ 98%  
 PFE ≥ 98% @ 0.1 micron  
**Breathability - Delta P** < 5.0 mm H<sub>2</sub>O/cm<sup>2</sup>  
**Flame Spread** Class 1

**LEVEL 2**

Ideal for procedures where moderate to light amounts of fluid, spray and/or aerosols are produced.

Meets EN14683 Rating – Type IIR Standard.

Pictured: Procedural Earloop with SecureFR™ Technology

## ASTM LEVEL 1

**Low Fluid Resistance** 80 mmHg  
**Filtration Efficiency** BFE ≥ 95%  
 PFE ≥ 95% @ 0.1 micron  
**Breathability - Delta P** < 4.0 mm H<sub>2</sub>O/cm<sup>2</sup>  
**Flame Spread** Class 1

**LEVEL 1**

Ideal for procedures where low amounts of fluid, spray and/or aerosols are produced.

Meets EN14683 Rating – Type II Standard.

Pictured: Isofluid® Earloop with SecureFR™ Technology

## LOW PERFORMANCE

**Surgical Molded Utility Mask**  
**Physical Barrier Only**  
**No LEVEL Performance Level \*\***  
**Filtration Efficiency** N/A

Ideal as a comfortable substitute for earloop face masks, this mask is a simple physical barrier ideal for exams and visitations or for dry, short procedures that do not produce fluid, spray or aerosols.

Pictured: Surgical Molded

## MINIMUM PERFORMANCE

**Utility Mask (Tissue/Tissue)**  
**Physical Barrier Only**  
**No LEVEL Performance Level**  
**Filtration Efficiency** N/A

Ideal as a simple physical barrier for exams and visitations or for dry, short procedures that do not produce fluid, spray or aerosols.

Pictured: Isolite® Earloop

## Understanding LEVEL Performance Levels for Surgical Masks\*

FEATURE	EXPLANATION
Fluid Resistance	Mask resistance to penetration by synthetic blood under pressure (mmHg). Higher resistance = higher protection.
BFE - Bacterial Filtration Efficiency	Percentage of particles filtered out at a pore size of 1.0 - 5.0 microns (µ).
PFE - Submicron Particle Filtration Efficiency	Percentage of particles filtered out at a pore size of 0.1 - 1.0 microns (µ).
Delta P - Differential Pressure	Pressure drop across mask, or resistance to air flow in mmH <sub>2</sub> O/cm <sup>2</sup> . Greater resistance = better protection but less breathability.
Flame Spread	Measures the flame spread of the mask material.

\*SOURCE: American Society for Testing and Materials Standard specification for performance of materials used in medical face masks. F2100-11 Standard.

## FULL LENGTH FACE SHIELD

- Optically clear, distortion-free wrap-around face shield.
- 1 1/2" foam headband holds shield away from face; "floats" lightly on forehead, with no pressure on temples; vented for increased air flow.
- Protects mask and face from direct splatter; may prolong mask life.
- Sonically welded elastic headband for added strength.
- Anti-fog treatment on inside and outside of shield.

## PATIENT SAFETY MASK w/ SHIELD

- U.S. Patent Nos 6,185,740 and 6,523,170.
- Covers patient's eyes and nose.
- Protects fragile eye and mucosal tissue from flying particles, spray and splatter.
- Makes patients feel safe, but not "in the dark," with attached clear-vision shield.
- Form-fitting profile, flexible materials provide maximum access to mouth.
- White spunbond inner and outer layers.
- Fluid resistant.

## Signage & Labeling Solutions

**Let GBS Help Your Organization Relay Critical Messaging During the COVID-19 Crisis!**

Our **Signage & Labeling Solutions** can assist you with promoting key safety measures for customers and employees.

A lot is changing about the way we do business in the face of COVID-19. And keeping your clients up-to-date with your COVID-19 Response Plan has become paramount! GBS is here to help you relay important information to your customers and employees through focused messaging on temporary exterior and interior signage.

**Interior Signage** for social distancing reminders, customer notices and more:

- Banner Stands
- Rigid Signs
- Adhesive Floor Decals

**Exterior Signage** for updated hours of operation, public announcements and more:

- 13oz Banners
- White Window Clings
- Yard Signs

**GBS' customized solutions can help you address your most critical needs. Contact us today to learn how we can provide you with high-quality, customized Signage and Labeling Solutions!**

*Customized solutions for increased productivity and efficiency*
