

EasyID® ADVANCE

EasyLABEL	EasyFORM	EasyID-MOBILE	EasyCAM	EasyREG	Downtime
-----------	----------	---------------	---------	---------	----------

EasyFORM, a module of EasyID®ADVANCE, reduces dependency on preprinted forms by enabling the user to custom print any form on a laser printer – automatically and on-demand or by schedule – with specific patient information merged.

EasyFORM is a comprehensive forms automation application, which manages forms generation and distribution via any network workstation/printer. It is also a server based application which allows an unlimited number of users. It has been proven to save time and money while improving medical efficiency by eliminating duplicate manual data entry.

FEATURES AND BENEFITS:

- Interfaces with most ADT systems– McKesson, Siemens, Eclipsys, CHCS and more.
- Increase patient safety by using computer confirmation to ensure the merged document matches the patient.
- Enhance JCAHO and HIPAA reporting capabilities by logging all patient encounters.
- Eliminate mistakes or intentional shortcuts by using HIBC standards to ensure the proper barcode is being scanned.
